EDUCATION

Dec 2019 College Station, TX Bachelor of Science in Geophysics, Texas A&M University

PROFESSIONAL EXPERIENCE

May 2021 - present San Franciso, CA

QA Automation Engineer II, Juniper Square @

- Utilized automation frameworks to test the complete flow of the application, from the UI to the API level, ensuring that all features and functionality were working correctly
- Implemented a visual testing framework, from initial proof of concept to integration within the CI/CD pipeline
- Directed and coached manual QA team members in coding and automation skills through one-on-one instruction and classroom-style training
- Migrated E2E testing environment from local Docker to a distributed AWS cloud-based setup utilizing Kubernetes orchestration
- Utilized Puppeteer's headless Chrome functionality to automate website loading and Lighthouse's automated audit features to generate detailed reports on website performance, accessibility, and best practices

Jun 2020 - Mar 2021 Madison, WI

Software Engineer Intern, TDS Telecom &

- Updated content and automated GIS data management tasks by developing Python scripts using ArcGIS REST API
- Delivered department-wide emails with file attachments using an SMTP server running on an asynchronous task queue
- Increased productivity of three interns through training on current project best
- Collaborated with a cross-functional agile team of software engineers on development, deployment, and troubleshooting
- Built a fully functional interactive dashboard from GIS map data using HTML, JavaScript, and Arcade
- Reduced project time by developing potential geospatial data engineering solutions and applications for outside departments

SKILLS

Programming Languages

JavaScript, Java, TypeScript, Python, HTML/CSS, SQL, Bash

Methods

Git Version Control, Agile Development, Object Oriented Design, CI/CD, SDLC

Frameworks

React, Cypress, Puppeteer, Playwright, Artillery, k6, testkube, Selenium, Node.js, Junit/TestNG, Applitools

Technologies and Applications

AWS, VS Code, Docker, Kubernetes, Postico, Postman, GitHub Actions , CircleCI , Jira , TestRail

PROJECTS

AI Learns to Play a Game 🔗

- Implemented JavaScript neural network library and a genetic algorithm to train an agent to play Flappy Bird
- Integrated neuroevolution of augmenting topologies by reinforcement learning algorithms on an agent

Calypso Theme 🤌

A cyber-futuristic theme for VS Code, Sublime Text, Atom, iTerm, and more. Available on Visual Studio Marketplace

Spotify Connected Web App

- App built with React, Node.js, and Express for visualizing personalized Spotify data such as top artists, tracks, recommendations, and audio features
- Implemented the Spotify OAuth flow with JavaScript and retrieved data from the Spotify API in a React app

INTERESTS

• Hiking, Baking, Yoga, Cooking, Gardening
